This behaves exactly as
expected. When we write
bar = foo in the above code
, the value of foo (the string
'Monty') is assigned to bar.
That is, bar is a copy of foo,
so when we overwrite foo
with a new string 'Python'
on line , the value of bar is
not affected. 4 Writing

Every revolutionary age
produces its own kind of
nostalgia. Faced with the
enormous social and
economic upheavals at the
nineteenth century's
end, learned Victorians like
Walter Pater, John Ruskin,
and Matthew Arnold looked
to High Church models and
played the bishops of
Western culture, with a
